

Goals from last week:

Start on milestone 2

What we've done:

1. Created trello accounts
2. Created customized storyboard
3. Created user stories
4. Assigned certain user stories to different members to split the work
5. Created group github and shared with group members
6. Added milestones and status reports to github

What worked:

Meeting together during class time, using discord, working together using trello.

What we learned:

We learned how to use trello and collaborate on our user stories.

Where we had trouble:

Had some trouble with github master/main branch and some errors with seeing uploaded pdf's, but they were all fixed.

Where we're stuck:

Not currently stuck on anything. There is a little confusion on when we should be starting the actual code, there seems to be little instruction regarding this.

Agenda for next meeting:

Start on milestone/sprint 3

Figure out when we will start the code

Meeting next week:

Tuesday we will plan our meeting for Thursday
